***Detailed Action***

***Response to Amendment***

1. Applicant's Remarks/arguments filed on 4/15/2008 regarding claims 1-5, 7-8 have been fully considered. Claim 6 has been cancelled by applicant. Claims 1-5, 7-8 are currently pending.

***EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE***

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a system and method for synchronizing a transmitter and a receiver in an IP network, including the unique functions of:

"wherein the time calculator is configured to measure a reception interval of the synchronous message, and the clock correction processor is configured to calculate, without using the synchronous message, the clock correction value when the reception interval of the synchronous message is more than a predetermined threshold."

The closest prior art, Ruffini et al. (WO 0042728 A), discloses a system and method for synchronizing between a transmitting unit and a receiving unit in a GSM network, wherein timestamp information, which is used to adjust and calibrate the clock of the local oscillator at the receiving unit, is received at the receiving unit. However, Ruffini fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
